

Changing Chrome Browser User -Computer

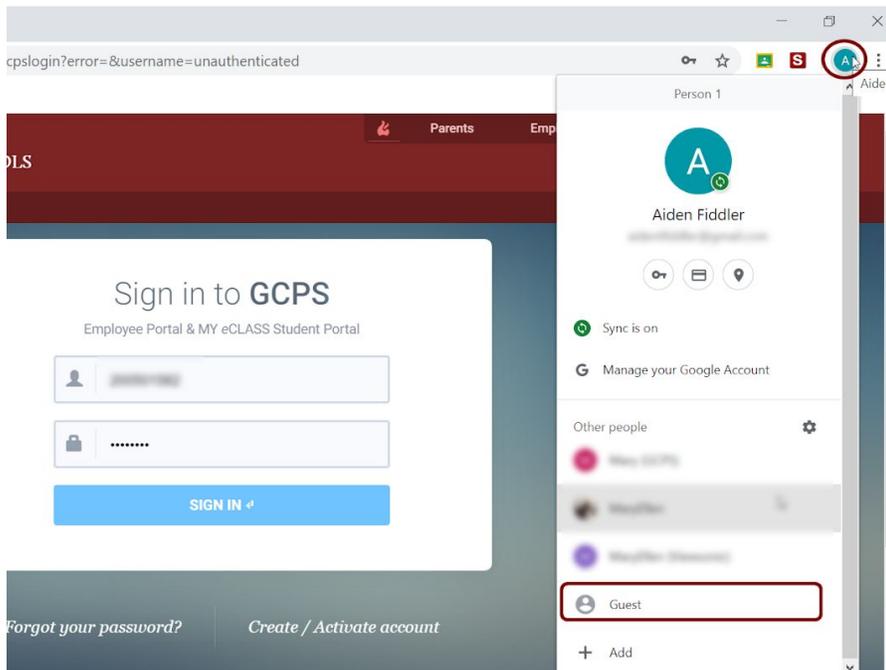

Gwinnett County Public Schools

See your LSTC or TST for additional support

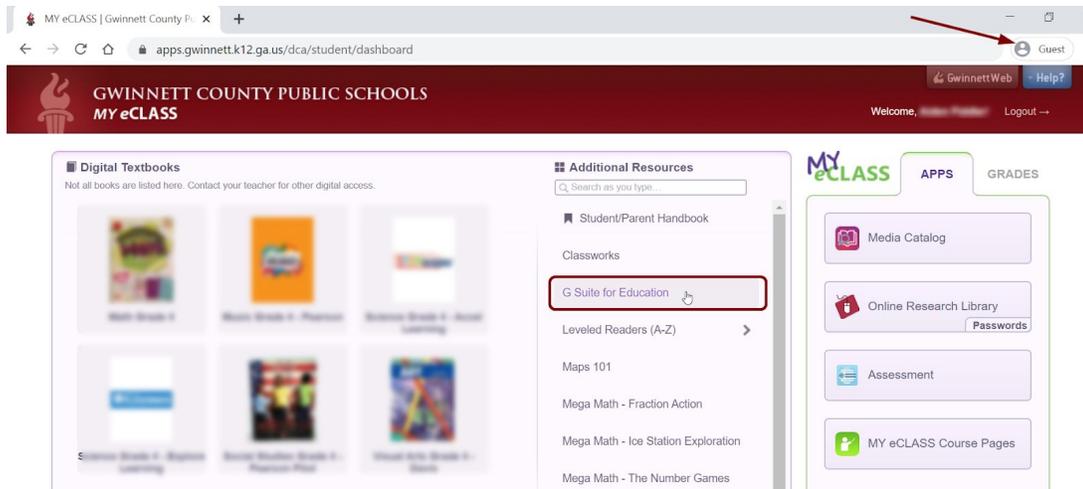

There are several options for changing the user in Chrome. This is important because when a user clicks on links, permissions are read based on the user from the Chrome profile, not just the G Suite accounts that you have logged into.

1. Browse as a guest (most simple option)

- Open Chrome
- Click on the image or initial in the top right corner to next to the URL bar.
- Scroll down and click on Guest.

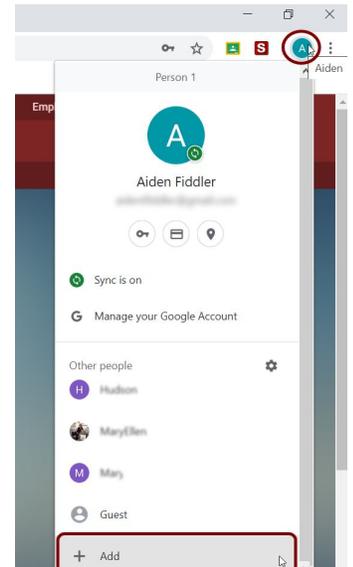

- A new window will open that is not associated with a G Suite account.
- Sign in to the student portal and then click on G Suite for Education.

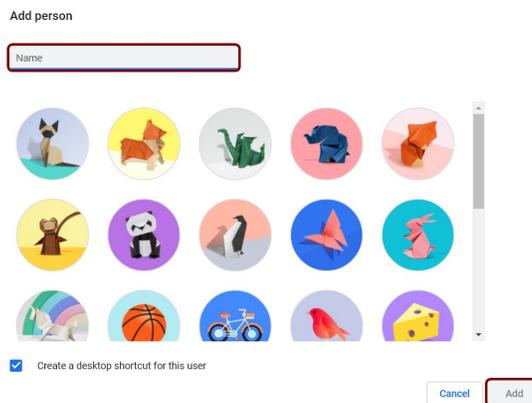

2. Create a Chrome Profile for your GCPS G Suite Account

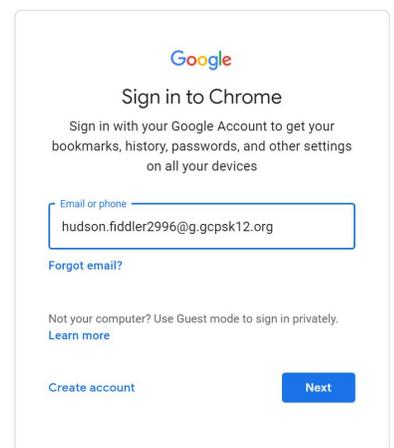

- Open Chrome
- Click on the image or initial in the top right corner to next to the URL bar.
- Scroll down and click on + Add.

- Enter a name for the profile and click **Add**.

- Follow the prompts to choose preferences or click skip through these steps.
- On the sign in screen, enter the GCPS Google account (firstname.lastname1234@g.gcpsk12.org) *Numbers are the last four digits of the student number.
- Click **Next**
- You will be redirected to the portal sign-in screen. Sign in here.
- To switch to this account in the future, click on the picture or initial in the top right corner next to the URL box and choose this profile.
